On the Subject of Letter Grid
Guess you should've taken a foreign language in high school, huh?
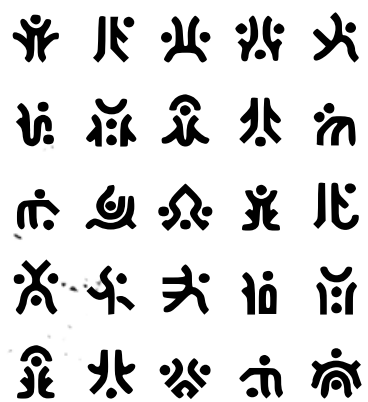

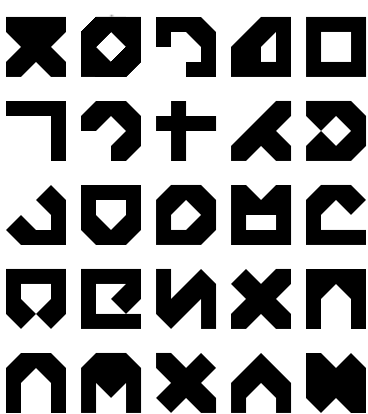

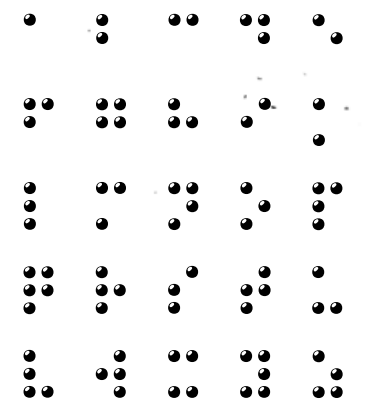

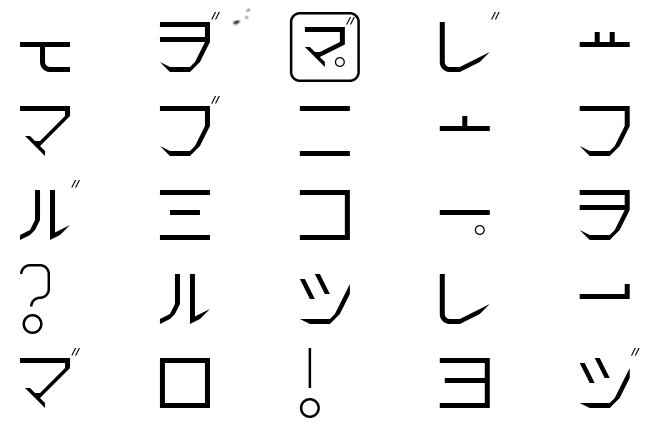

- The module has one of every letter from A–Z excluding J in a 5x5 grid. However, each letter will be encrypted differently.
- The grid will contain one or more (albeit very rarely) words from a word list below.
- Select the row or column that has a word from the word list, spelled either forwards or backwards.
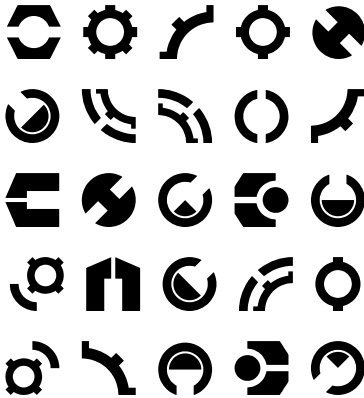

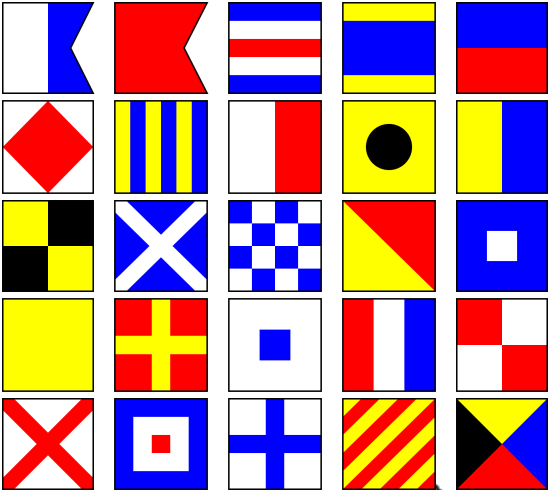

Actor	Brawl	Curve	Delta	Elude

- The following encryptions will be present on the module. Letters will be listed from A–Z in a 5x5 grid.
